

Lyrean Community Resolution 1

Adopted by the Lyrean Council on August 5th 2022

Pursuant to this resolution enacted per the mechanisms of §3.2 of the Lyrean Charter, the Lyrean Community henceforth:

Condemns in the strongest possible terms the tactic of obsidian bombing, by any actor, against any non-military target, in times of war or peace.

Recognizes that the obsidian bombing of non-military targets is a type of grief, and not a legitimate method of war, or an inevitability of conflict on CivMC.

Defines a ‘military target’ as any structures used predominantly for the commission of defensive or offensive military action, including bunkers, vaults, iceroads, or any structure which otherwise facilitates the continuation of war, such as farming infrastructure.

Considers that the obsidian bombing of non-military targets constitutes a severe and actionable violation of the Lyrean Community’s first core principle, “peace and friendship”.

Disavows the use of obsidian bombing against non-military targets by any member of the Lyrean Community under the threat of expulsion.

Vows that all members of the Lyrean Community will be henceforth *obliged* to aid in the clean-up of any non-military targets of obsidian bombing within the Lyrean Community, via means of acidblocking, digging, or other necessary measures to return the affected area to its status prior to being grieved in this manner.
